

family is everything

NetAXS™ – the perfect family to meet your customers' needs.

Our popular NetAXS family offers a complete portfolio of web-enabled access control solutions, and the family now includes a new, cost-effective 2-door control panel for even greater flexibility. With a basic, standard or advanced solution, NetAXS is suitable for any size facility and customizable for each customer's security and functionality needs. Plus, its built-in web server gives your customers the power and convenience to securely manage their access control system over the Internet—anytime, anywhere—with no additional software to install. **NetAXS – it's one family you'll want to know.**
