

access with an edge

Finally, a web-based access control system that doesn't hold you back.

Are you ready for an access control system that lets you expand your system quickly and easily whenever your needs change? The innovative modular design of NetAXS-123 gives you easy expansion and more. By moving the system to the edge of your existing network, we've eliminated the costs and complexities associated with most access control systems—making it more cost effective and easier than ever to use. Plus, with Honeywell's connected business solution, you can harness the power of the Internet to have access to your information anytime—which means you're able to make informed decisions quickly.

Honeywell

Push your access control to the edge with NetAXS®, and watch your business grow.
